

• Welcome home the beauty of glass.

Home begins
at the door.

By choosing a Therma-Tru door system with decorative glass, you can create a beautiful, durable entrance that makes a statement – one that says you have high standards for style, quality and craftsmanship. Our wide array of glass designs, from simple to intricate, reflect the home design trends and homeowner desires of today and tomorrow.

With Therma-Tru glass, you can expect the quality and trust that can only come from the Therma-Tru brand. More building professionals put their trust in Therma-Tru, a preferred brand among builders and remodelers,* because of its outstanding beauty, performance and durability. Entryways come to life with Therma-Tru glass and provide beauty and craftsmanship you can't find anywhere else.

And doors come to life with Therma-Tru® glass.

- Numerous glass colors, textures, shapes and coming options complement any Therma-Tru door, and provide flexibility to match any homeowner's personal style.
- Our glass designs are researched in the market to ensure they are highly rated in consumer preference.
- We have decades of experience and technical know-how in creating quality glass designs that deliver optimal performance.
- Therma-Tru decorative glass is handcrafted and built with all glass bevels for premium quality.
- Backed by a limited lifetime warranty when installed in a fiberglass door system to help ensure peace of mind should any issue arise during or after installation.**
- All clear and Low-E glass panels are tempered to help provide added safety.

*Brand Use Studies, 2012 *Builder* and 2010 *Remodeling* magazines.

**For complete details on our warranty, see your Therma-Tru representative or visit www.thermatru.com.

Classic-Craft® Premium Entryways

Thanks to more than 13 exclusive decorative glass families and multiple sidelite and transom configurations, you'll find the ideal style to enhance any home when you select a Classic-Craft premium entryway. High-end glass produces intricate, truly distinctive designs that showcase and bring life to your entryway.

Beautiful in every way.

More than 10%
larger glass*

**Classic-Craft
Premium Glass**

Standard Glass

- Classic-Craft glass is more than 10% wider*, welcoming more light into the home and creating a distinctive entryway.
- Species-specific and grained fiberglass lite frames are made with the same material as the door to seamlessly blend with the rest of the entryway.
- All Classic-Craft clear glass options are Low-E, providing long-term energy efficiency.
- All privacy and decorative glass options feature triple-pane construction that help reduce outside noise while increasing energy efficiency.
- Any Thermo-Tru glass added to a Classic-Craft entryway is covered by the same outstanding limited lifetime warranty.**
- All Classic-Craft sidelites are manufactured with glass that is flush-glazed. This process integrates the glass during the manufacturing process, eliminating the need for a separate lite frame and providing a superior performance seal. Flush-glazed glass features clean lines and eliminates the need for screw plugs.

*Compared to other standard fiberglass doors.

**For complete details on our warranty, see your Thermo-Tru representative or visit www.thermatru.com.

Privacy Glass

Elegant designs with higher opacities.

All Therma-Tru® entry door collections and sidelites can be fitted with our four elegant privacy glass designs. Each of them enhances a home with privacy, peace of mind and the beauty of textured glass while still allowing natural light to brighten the interior.

- Varying opacity levels range from 8-10.
- ENERGY STAR® qualified options provide excellent energy efficiency.

- All privacy glass options are triple-pane, providing added security, thermal efficiency and reduced sound transmission.
- Triple-pane construction also allows for an easy-to-clean surface.
- All privacy glass is covered by Therma-Tru's limited lifetime warranty* when installed in a fiberglass door system.

Chord Glass

A vertical flowing pattern reminiscent of waves on the water.

Glass Privacy Rating

Chinchilla Glass

A free-flowing configuration, presenting quiet lines and curves.

Glass Privacy Rating

Rainglass

An elegantly fashioned glass, featuring ripples of cascading water.

Glass Privacy Rating

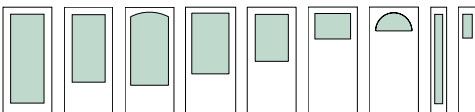

Granite Glass

A course grained arrangement with surface detail over the entirety of glass.

 This symbol identifies glass that is available for use in Wind-Borne Debris Regions and the High-Velocity Hurricane Zone when paired with an approved Therma-Tru door system. Please consult your Therma-Tru representative for more details.

*For complete details on our warranty and ENERGY STAR® qualified products, see your Therma-Tru representative or visit www.thermatru.com.

Impact-Rated Glass

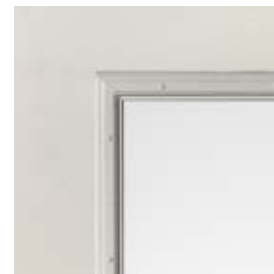

Therma-Tru's Impact-rated glass meets coastal region codes and regulations,* offering excellent protection in extreme weather conditions while providing added security.

- Used for products in coastal applications, Therma-Tru measures the resistance of the glass to flying debris by firing a 2" x 4" wood stud at a speed of 34 mph to help prevent damage inside the home from severe weather.
- Available for clear, privacy and 13 decorative glass options.
- Impact Lip-Lite frame is constructed of aluminum for superior durability.
- Special laminated glass construction helps protect the interior of the home.
- Tested to meet code requirements in coastal areas, including Florida, Texas and the Carolinas.*
- Designed to withstand wind forces up to 195 mph (DP-65) for coastal applications and security when paired with an approved Therma-Tru Impact-rated door.** Able to withstand wind forces up to 167 mph (DP-50) in a Therma-Tru non-Impact-rated door.

Therma-Tru Lip-Lite Frame

Therma-Tru Impact Lip-Lite frame features an attractive scrolled profile with a screw channel cover.

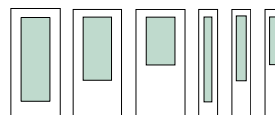

Other Industrial Type Frames

The width of most industrial type frames limits your choice of locksets, and they have industrial looking profiles.

- Glass and door configurations are available for use in High Velocity Hurricane Zone (HVHZ) and Wind-Borne Debris Regions.
- Available for Fiber-Classic®, Smooth-Star® and Steel doors.

Glass Shapes

 This symbol identifies glass that is available for use in Wind-Borne Debris Regions and the High-Velocity Hurricane Zone when paired with an approved Therma-Tru door system. Please consult your Therma-Tru representative for more details.

Internal Blinds

Internal blind options provide an elegant, hassle-free way to control light and privacy while seamlessly blending in with the door's style.

- Enclosed between two pieces of tempered glass for enhanced safety and performance.
- With no dangling cords, this is a kid- and pet-friendly choice.
- Tilt open and close, and raise and lower, for desired privacy level.
- Blinds remain dust free, and glass is easier to clean than traditional blinds.
- Available for grained or smooth-surface doors.

*Must be installed as part of a Therma-Tru door system in compliance with a Therma-Tru Impact-rated product approval. Visit www.thermatru.com for product approvals. Follow weather and news reports in order to assess severe weather situations and obey local authorities' shelter and evacuation orders. No product guarantees safety for persons or property, nor makes any premises hurricane- or impact-proof.

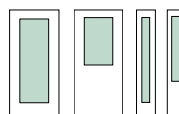

**Impact and structural performance of a single Therma-Tru fiberglass door with multi-point locking system.

Bevelline

Grilles and External Lite Dividers

Enhancing beauty with decorative appeal.

Add decorative elements with external grilles, grilles thermally sealed between glass and external lite dividers, creating visual interest that enhances the beauty of any home. All grille types come available in traditional, Craftsman or Prairie styles to complement any home's architectural detailing.

Grilles Between Glass (GBG) Options:
Contoured Grilles
Flat Grilles

Grilles Between Glass

- Smooth profile keeps glass easy to clean, with no obstructions.
- Housed inside two panes of tempered glass.
- Configurable with standard clear glass or energy-efficient Low-E glass.
- Choose from contoured or flat grilles.

Removable Wood Grilles

- Easily removable for cleaning.
- Traditional look that can match other exterior windows.
- Wood grilles can be stained or painted to complement home décor.
- Configurable with standard clear glass or energy-efficient Low-E glass.

External Lite Dividers

- Adds a stylish appeal to entry and patio doors.
- Available in a variety of Craftsman-style designs.
- Configurable with standard clear glass or energy-efficient Low-E glass.

Fixed Grilles

- Traditional look that can match other exterior windows.
- Can be stained or painted to complement home décor.
- Configurable with standard clear glass or energy-efficient Low-E glass.
- Molded as part of the lite frame.

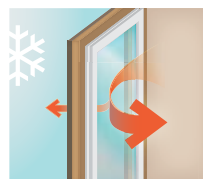

Additional Products

- Contemporary glass with brass-plated grids sealed between glass.
- Bevelline® glass with designs that create the look of fine-cut facet crystal.

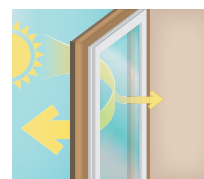

Energy Efficiency:

In any region or climate, energy efficiency is key. More than 94% of Therma-Tru® products are ENERGY STAR® qualified and National Fenestration Rating Council (NFRC) certified*, helping save money on energy costs.

- Most Therma-Tru decorative glass features triple-pane construction, creating an exceptional thermal and acoustical barrier.
- Factory-coated Low-E glass, available as an option for clear glass, delivers exceptional energy efficiency.

In cold weather, Low-E glass reduces the loss of heat by reflecting the heat back inside the home.

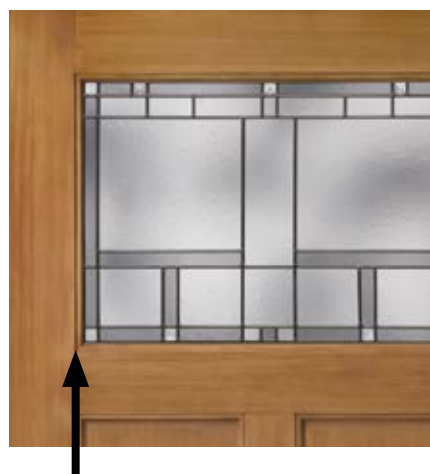

In warm weather, Low-E glass reflects the sun's rays off of the glass, keeping the interior of the home cool.

Flush-Glazed Glass:

Glass built directly into the door during the manufacturing process eliminates the need for a lite frame and provides a high-performance weather seal.

- All Classic-Craft® sidelites are manufactured with flush-glazed glass.
- Select Classic-Craft, Fiber-Classic® and Smooth-Star® doors have flush-glazed glass options.
- Flush-glazed glass features clean lines and eliminates the need for screw plugs.

Features frameless design.

Quality Testing:

We put our glass through multiple rigorous tests to help guarantee it will live up to even the toughest quality and performance expectations.

Slam Test: Glass-fitted door is opened and closed repeatedly. Our slam tests are performed to commercial standards, which are stricter than what is required for residential use, to help ensure the durability and performance of the glass and door.

Frost Point Test: We expose our glass to weather-like conditions to help prevent moisture and condensation from getting trapped inside the glass to help preserve the beauty and quality of the glass.

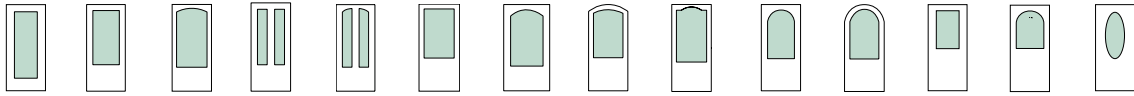

Limited Lifetime Warranty:

We place a lot of emphasis on achieving the highest level of customer satisfaction. That's why Therma-Tru® fiberglass door systems carry a limited lifetime warranty.* Should any issues arise during or after installation, we'll address them in a professional, timely manner.

**LIMITED
LIFETIME
WARRANTY**

Inspirational Designs

- With various glass colors, textures, shapes and coming options – designed with varying home styles in mind – Therma-Tru's glass portfolio helps create a stunning look to enhance any entryway.

Engineering Expertise

- We have decades of experience and technical know-how in creating seamless glass and high-performing door systems.
- Rigorous testing and evaluation helps ensure the glass and complete door system meet our high quality and performance standards.
- We back our glass with a limited lifetime warranty* when installed in a fiberglass door system.

Market Knowledge

- Our continual market research uncovers glass styles that meet the building needs of our customers, and the look and performance expectations of the homeowner.
- Our glass designs are highly rated in consumer preference and expand your ability to sell more glass in the market to satisfy customer needs.
- Therma-Tru is constantly working to understand changing building regulations and code compliance to provide products that meet or exceed industry standards.

Portfolio Breadth

- Our 30 decorative glass designs, and four privacy glass options, complement various home styles and homeowner desires.
- Grilles and external lite dividers can complement the windows and architectural style of a home.
- Internal blinds provide privacy without hassles or safety concerns.
- Low-E glass offers outstanding energy efficiency, and 94% of Therma-Tru glass is ENERGY STAR® qualified.

*For complete details on our warranty and ENERGY STAR® qualified products, see your Therma-Tru representative or visit www.thermatru.com.

Note: Colors may vary from an actual application due to fluctuations in staining or the printing process of this brochure. Glass privacy ratings may be more or less than indicated, based on glass design and size of glass. Glass designs may differ from depiction due to handcrafting and size of glass. See your Therma-Tru representative or visit www.thermatru.com for details.
